

## Marine Calibration Kit

TEST & CALIBRATION EQUIPMENT

### DESCRIPTION

The TUVO Instruments Marine Calibration Kit (MCK) enables the user to perform temperature and pressure tests, measurements and calibrations for all types of instruments. The Marine Calibration Kit is unique to the market due to its composition and handy case. It contains a complete pressure test set as well as a temperature test including all necessary accessories and certificates according to IMO regulations. The most requested and applicable Marine Calibration Kit is the MCK 60/650 Kit purchasable under article number: 142576\_S

### TYPES

Type of Marine Calibration Kits:

Type	Pressure	Temperature
MCK 60/650	-1 ... 60 bar	250°C
MCK 60/650	-1 ... 60 bar	650°C
MCK 300/650	0 ... 300 bar	650°C
MCK 700/650	0 ... 700 bar	650°C
MCK 700/850	0 ... 700 bar	850°C

### WHATS INCLUDED (60/650)

- SIKA Temperature calibrator 230V 50/60Hz
- TUVO Instruments TP 60 bar pressure test kit
- TUVO Instruments digital test pressure gauge
- WIKA Test pressure gauge 0-60 bar/psi 1.0
- Infrared Thermometer
- Test certificate for SIKA temperature calibrator
- Test certificate for TUVO digital pressure gauge
- Test certificate for WIKA pressure gauge
- Heavy-duty Peli case trolley
- Seals
- Accessories
- Adaptors
